

Endoscopy Surgery
Dynamic System

Foot Switch

Power Cord

- Ambient Temperature: 5℃~30℃
- Relative Humidity: ≤80%Rh
- Atmospheric Pressure: 860hPa~1060hPa
- Power Supply: ~ 220V; 50Hz
- Input Power: 200VA

Orthopedic Shaver System

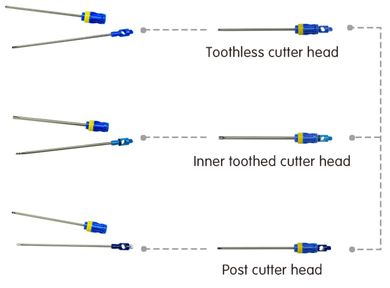

Quick-change tool connection. Both the power handpiece and its cable can be sterilized via high-temperature, high-pressure autoclaving.

High-speed motor delivers powerful and stable output torque of 45 mNm, ensuring user-friendly operation.

The handpiece shell temperature rise is ≤ 25°C, with low noise emission ≤65 dB, suitable for prolonged continuous operation.

Power output speed ranges from 0 to 12,000 rpm, with foot pedal control for seamless stepless speed adjustment.

Output Power: Over 100W.

Handle

- **Handpiece: Adjustable rotation direction**
- **Speed Range: 10,000RPM**
- **Torque Constant (6-step DC drive)at 155℃ winding temp oz-in/Amp DC: 1.12 - 4.04, mNm/Amp DC: 7.92 - 28.5**
- **Blades: Single-use**

ENT Shaver System

Quick-change tool connection. Both the power handpiece and its cable can be sterilized via high-temperature, high-pressure autoclaving.

Handle

- **Handpiece: Adjustable rotation direction**
- **Speed Range: Up to 4,000 RPM**
- **Torque Constant (6-step DC drive)at 155℃ winding temp oz-in/Amp DC: 1.12-4.04, mNm/Amp DC: 7.92-28.5**
- **Blades: Reusable**
